

As we get started with this course, I wanted to let you know that I've created a GitHub repository for the playground project we'll be using throughout the course. You can find the repository at:

<https://github.com/mosh-hamedani/react-course-part1>

This repository contains all of the example code and exercise solutions that I'll be showing throughout the course. This way, if you ever get stuck or want to compare your code to mine, you can easily access all of the code examples and solutions in one place. Happy coding!
